

Central Wire Industries ships profiled wire in a variety of different package options to meet the needs of your specific application or requirements. From coils and cut lengths to full reels, we have a solution to work with your storage and payoff setup. Take a moment to learn more about our different packaging options below. If not specified in your purchase order, Central Wire will select the best packaging option for the size and quantity of your order. If you do not see the package you need, please contact our material and application experts so we can help get you what you need.

### **Coils**

Coils are ideal for shipments ranging from 5 kgs to 1200 kgs (11 lbs to 2645 lbs). They are a low maintenance storage solution that reduces excess or bulky packaging. Material can be wrapped in either clear plastic shrink wrap, or weather protective wrap for overseas transportation.

### **Cut Lengths**

Cut lengths are available from 100 mm to 6500 mm (3.9 in to 255.9 in) with a minimum tolerance +/- 1 mm (0.04 in). They are typically shipped in protective wooden crates/boxes.

### **Spools**

Spools are available for shipments ranging from 5 kgs to 1200 kgs (11 lbs to 2645 lbs). Customers can choose between steel spools or black plastic spools. While plastic spools are less durable and come in fewer sizes than metal spools, they are a lightweight option that reduces shipping and handling weight. Steel spools are available in a wide range of sizes and configurations, and they are a durable option that allows for convenient storage and handling.
