

## Certified Excellence in Profiled Wire Manufacturing

Central Wire Industries is a leading manufacturer of high quality profiled wire. Our Rotherham, UK facility holds an ISO 9001:2015 Certificate, and our profiled wire is always tested in accordance with ASTM International and ISO/EN standards. Our skilled engineers and metallurgical experts use state-of-the-art equipment to rigorously inspect profiles for accuracy and consistency. Whether you need stainless steel square wire or X750 flat wire, we can guarantee all of our products meet the highest possible standards, regardless of application or function. We are committed to meeting and exceeding our customers' expectations through engineering excellence, superior customer service, and unparalleled quality.

### Testing Procedures

- Tensile
- Elongation
- Proof
- Bend
- XRF
- Dimensional Inspection
- Surface Roughness
- Magnetic Permeability
- Vickers Hardness

We draw on decades of manufacturing experience to produce our high quality profiled wire. We even produce our tooling on-site, which allows us to have complete control over the consistency of our rolls. We also work with a broad range of materials, including stainless steels, nickel alloys, brass, copper, and we can even recommend a material for your application. With strong in-house technical support and exceptional customer service representatives, we can help you develop complex profiles for even the most exacting requirements.
